

SPECIFICATIONS

ULTRASORB 4 [®]
100% carbon fiber filtration media

Filtration Media

Grade U4100

Materials: 100% Activated Carbon Fiber

Weight: 100 grams per square meter +/- 10%

Specific surface area (BET rating): 1000-1200 m²/g

Average pore radius (Angstrom): 10-15

Carbon Tetrachloride Number (predicted): 78.75 g/100g

Pressure drop: 0.021 inches w.g. (10.5 ft/min air velocity)

* Unless otherwise stated, the information contained herein represents in-process lot averages only.
