SAFCORD

Stop using messy duct tape to cover those hazardous cables and cords flowing over foot traffic areas. SafCord attaches to office loop carpet quickly, using Velcro hook. A 2.5" tunnel is created in the center to hold several cords or cables. No more sticky tape residue left on carpeting. It is available in Yellow or Grey, in 6 foot and 30 foot rolls. It can be cut to size and will not unravel or fray. SafCord provides the lowest possible profile as it keeps cords in place. Scuffing feet and vacuums will not budge SafCord, it stays in place until you "lift it off".

Safety:

- Reduce Trip Hazards

Quick & Easy Application & Removal:

- Reusable - Press On... Lift Off
- Can be used on stairs too!

Multiple Applications:

- Conference Rooms
- Classrooms
- Sound Stages
- Photography
- Audio Visual
- Recording Studios

Made from industrial grade Dupont Cordura nylon with nylon stitched hook latch material, hides unsightly cords and reduces the chance of a trip or fall from an exposed cord.

Washable and Reusable. Eliminate costly carpet cleaning from tape residue left behind. SafCord works on loop carpet, (commercial grade rugs) or Berber carpet. It does not work on cut pile carpet.

Features only SafCord has:

- SafCord is the only non-adhesive method for securing cords on stair carpet, along carpet trim, around curves and within tradeshow booths.
- Unlike tape, SafCord secures cords in place while allowing you to pull slack or slide the cord through the tunnel underneath the SafCord.

Benefits you can appreciate

- No messy tape residue left behind to dirty your carpet or stick to shoes.
- Reusable, washable and portable, take it anywhere.
- Saves money by eliminating the need for costly duct tape and carpet cleaning.
- Keep cables organized and in order.
