Marketing Inc.**
DBA Comfort First Products

Comfort First Products is dedicated to employee comfort and safety. We design and sell HVAC products to enhance employee's Thermal Comfort (Preventing those too hot or too cold employee complaints) and filter incoming air for employee health and safety. **If you don't filter the air your lungs will.**

Capabilities/Values

If you want to go **Green** and **save energy**, improve employee comfort and health, all while **improving indoor air quality**, then our diffuser is the solution you've been looking for.

Our products are **value added, as they do more than just diffusers the air.** They prevent cold and hot air drafts from overhead air diffusers blowing onto workers below, causing illness and allergies from ductwork pollution contained in that air. Cleaning existing ductwork is impossible at times and prohibitively expensive. Filtration can control ductwork filled with decades of dust or allergen, protecting employees from illness or allergy attacks.

Many hospitals and medical facilities are required to have **MERV 14** filters downstream from the air handler and the Comfort First Filtered Diffuser can satisfy that requirement. Ideal for labs that need a dust and draft free environment!

Products

Comfort First Filtered Diffuser - Powder coated steel 2' x 2' supply air diffuser, with MERV 12 or MERV 14 filters improves indoor air quality. Also the 4-way adjustable directional air flow eliminates air draft complaints and improves office comfort. It replaces an existing supply diffuser or can be specified in new buildings.

Control-A-Flow Draft Eliminator - Eliminates drafts from overhead air vents by re-directing the air along the ceiling line, preventing employee discomfort and complaints. It easily clips onto a conventional T-bar grid in seconds and no tools are needed. It's the perfect solution to improve office comfort without calling an HVAC professional.

Facilities and Equipment

Our office and warehouse is located in **Santa Ana**. We distribute the **Comfort First Filtered Diffuser** that is manufactured to our patent specifications. We assemble and distribute our patented **Control-A-Flow Draft Eliminator**.

Expertise

We have over 20 years of experience working with the HVAC industry (Heating, Ventilation, Air Conditioning). Our staff will be able to help you find the best solution to your HVAC Diffuser needs.

Retail Customers

NY MTA - Guardian, Ivoclar Manufacturing Inc., Camp Lejeune Naval Hospital, Brookdale Hospital, Citizens Bank USA Headquarters, Oak Ridge National Laboratory, Yale University, Stanford, Ashok Enterprises, Fastenal Company.

Distributors

W.W. Grainger, Allied Refrigeration, Johnstone Supply, US Air Conditioning, United Refrigeration, Refrigeration Supply Distributors, Ketchum & Walton

Summary

Save energy, keep your employees happy and healthy by redirecting and filtering your HVAC supply air. Do this and support a Woman Owned Business.
